

Ela Bayoudh

Cloud & Cybersecurity Engineering Student

 Tunisia •  +216 29203089 •  elaabayoudhpro@gmail.com •  [mon_portfolio](#) •  [my_github](#) •  [LinkedIn](#)

Summary

Cloud & Cybersecurity engineering student, seeking an end-of-study internship in cybersecurity starting January 2027. Hands-on experience in network traffic analysis and firewall security policies, SOC detection via a personal SIEM lab, and integration of security controls into DevSecOps pipelines. Rigorous, collaborative, and always actively learning (personal labs, CTFs), I aim for a security engineering team in network security, cloud, application security, or security data telemetry.

Education

École Supérieure Privée d'Ingénierie et de Technologies de Monastir (ESPRIM)	Engineering Degree
Cloud & Cybersecurity	09/2024 - 2027 (expected)
Institut Supérieur d'Informatique et de Mathématiques de Monastir (ISIMM)	Degree — Software Engineering and Computer Science
Software Engineering	09/2021 - 06/2024

Professional Experience

Nouvelair	Monastir, Tunisia
Intern	07/2026 - 09/2026
Analysis of network traffic and the security policy of a Cisco FTD firewall (see the “Flow Guard” project below). Collaboration with the network manager to validate the proposed ACL rules.	
Electrocontact Tunisie	Ksar Hellal, Tunisia
Intern	07/2025 - 08/2025
Design and development of a web-based production tracking platform for the digitalization of the industrial process.	
Pura Solutions	Sousse, Tunisia
Intern (Final Year Project)	02/2024 - 06/2024
Design and development of a platform for the secure sharing of confidential accounting documents, hosted on the OVH cloud.	
Proxym-IT	Sousse, Tunisia
Intern	07/2023 - 08/2023
Design and development of an online cinema booking platform.	

Projects

Flow Guard — Network Traffic Matrix & ACL	07/2026 - 09/2026
Tool transforming real Cisco FTD firewall logs into a traffic matrix to detect ACL rules that are overly permissive or not governed. 6 engines developed: parsing, aggregation, traffic matrix, criticality scoring, anomaly detection, ACL proposal generation. 7-page web interface. Result: reduction in the false-positive rate from 81% to 0.5% in 3 iterations; 23 unsecured network segments identified. Solution validated across 3 sites (183,000+ log lines, 43,000+ flows). Stack: FastAPI, SQLAlchemy, SQLite, React, TypeScript.	
SOC Detection & Incident Response Home Lab — Personal Project	08/2026
Complete SOC lab: Wazuh SIEM, Windows/Linux endpoints, Kali attack machine, isolated VMware network. End-to-end Windows/Linux administration (installation, hardening, agent deployment). Detected scenarios: SSH/RDP brute force, modification of sensitive files (FIM), with structured investigation. Identification of a gap in the default Wazuh ruleset and design of a custom correlation rule.	
DevSecOps Automated Security Pipeline — Personal Project	04/2026
CI/CD pipeline with security integrated from the commit stage (shift-left): secret scanning (Gitleaks) then Docker vulnerability scanning (Trivy) on every push, deployment automatically blocked if a control fails. Real issues solved: bypassing a Gitleaks license limitation and replacing an unstable Railway CLI with calls to its GraphQL API. Stack: GitHub Actions, Docker, Gitleaks, Trivy, Railway.	

SentinelBank – Secure Cloud-Native Banking Platform – Team Project01/2026 - 05/2026

Cloud-native neobank in a Zero Trust architecture (microservices, segmented network, SOC), aiming for NIST/OWASP/PCI-DSS standards; team project using Scrum methodology. Stack: Java/Spring Boot, Angular/TypeScript, Keycloak, MySQL, Docker.

DataRoom – Final Year Project (FYP)02/2024 - 06/2024

Design of a cloud platform for the secure sharing of confidential accounting documents (Next.js, NestJS, MongoDB).

Skills

Security – Hands-on:

Network & Firewall: Cisco FTD/FMC, network traffic analysis, ACL (least privilege), Network Segmentation, Zero Trust, SOC & Detection: Wazuh SIEM, creating attack scenarios and analyzing alerts, CTF practice, AppSec

DevSecOps

Secret Scanning, Security Gates, Docker, Kubernetes, GitHub Actions, GitLab CI, Trivy, Gitleaks

Security (Foundations)

IAM, Active Directory, MFA, RBAC, VPN, SIEM/SOAR

Cloud & Infrastructure:

Docker, Kubernetes, OpenStack, Linux, Nginx

Development

Java, JavaScript, TypeScript, Python, PHP, SQL, Bash, React, Next.js, Angular, HTML, CSS, NestJS, Spring Boot, Node.js, SQLAlchemy, REST API, JWT, FastAPI

Soft Skills:

Leadership & teamwork, collaboration, autonomy & learning

Languages

Arabic	French	English
Native	B2	B2

Volunteer Experience

Scout Leader – Scouts Tunisia01/2017 - Present

Tunisia

Leadership, team supervision, multiple trainings.

Board Member – President, Robotics Trainer, CPU ISIMM Club11/2021 - 01/2024

Activity management and integration of new members.

Awards

1st place – GreeNovation Hackathon (ESPRIM)12/2024

“EasyLex,” an AI-powered educational tool for dyslexic children.

2nd place – Mini CTF Securinets EPS (Polytech Sousse)02/2026

Web, Crypto, Forensics challenges.

2nd place – Cybersecurity Hackathon “Insight” (IEEE ESPRIM SB)11/2025

Securing web environments.
